

# GO GREEN WIDCOMBE

*Dear Mike Youe,*

*We understand that the CRT are planning to upgrade the canal towpath between Bathwick Hill and Widcombe (the Bath Locks section).*

*Go Green Widcombe aims to encourage local residents to think and act in a more environmentally friendly way.*

*We believe that making the towpath more user friendly (and a lot less muddy) could encourage more people to walk rather than drive.*

*As well as being better for the environment, walking is good for physical and mental health.*

*This particular stretch of canal is also a "green way" close to the city centre... bringing the feeling of countryside close at hand.*

*Therefore we support this project.*

*Steve Cross, Go Green Widcombe*
